

# Carina Heights Child Care & Development (2019)

## Non-Prescribed creams, lotions or powders Form

**SCOPE:** this form is only to be used for non-prescribed products applied externally to the skin including lotions, creams and powders. The only exception to this is teething gels and powders. All other substances applied inside the mouth must use the Medication Administration Form. If the product is prescribed by a medical practitioner, the Medication Administration Form must be used and a label must be affixed to the product.

### Child Details

Surname:

Given name:

Room:

### Product Details

Name of Product:

Chemist label : yes / no

Reason for use:

**Instructions or details relating to the product including amount to use, when to use it and any application details:**

\*Please note “as needed” or “when necessary” does not provide enough information for a child’s educator to ascertain when to use. Please provide a description of when and how to apply.
